

## Zimmer® Contour Ceramic Abutments

### Strong. Beautiful. Simple.

Engineered to work with our renowned *Tapered Screw-Vent®* Implant System, the new line of Contour Ceramic Abutments from Zimmer Dental delivers an exceptional combination of strength, esthetics and simplicity. Crafted from high-strength zirconia, *Zimmer Contour Ceramic Abutments* provide a natural-colored base for an esthetic, all-ceramic crown – increasing the likelihood of overall patient satisfaction, particularly in anterior cases. These stock ceramic abutments require minimal preparation time, and with a variety of cuff heights available, there's an appropriate *Zimmer Contour Ceramic Abutment* for virtually every case.

#### Zimmer Contour Ceramic Abutments feature:

- Strong zirconia material for a natural-looking, esthetic solution
- No metal margins visible, should tissue recede
- Prepared margins to minimize preparation time
- Abutment collars that are contoured below the margin, allowing space for soft tissue around the implant

## A beautiful fit right off-the-shelf.

As illustrated below, *Zimmer* Contour Ceramic Abutments feature a pre-defined offset margin that's lower on the buccal aspect and higher on the lingual aspect, virtually eliminating the need to prepare the abutment for a crown. The titanium interface ring provides a titanium to titanium connection for a precise fit between the implant and the abutment. This allows for a seat that you can rely on. In addition, these abutments are offered in a variety of platform diameters and cuff heights. By delivering both excellent clinical results and exceptional convenience, *Zimmer* Contour Ceramic Abutments are sure to be a beautiful fit for your patients – and your practice.
